No Excitement Here. Silk From Spiders. Church Sensationalism.

By ARTHUR BRISBANE

(Copyright, 1921.) England has one man idle to three here. England's food cost has dropped 2 per cent in thirty days. Here it has gone up 4 per cent in sixty days. There they are excited about "the hard, dangerous winter" that is coming. Seven labor mayors insist on seeing Lloyd George, although he is too ill to iscuss the problem with them.

Here we are not excited at all. Why should we be, since railroads, having reduced wages, raised fares and got another \$500,000,000 from the Treasury, announce that their stockholders are doing fairly well? If no hard winter threatens stockholders, why worry? That sounds reasonable, perhaps, but someone ought to tell the stockholders to tell those the control that a hard winter might be hard enough even to worry them.

Dr. Steinmetz, genuine genius of the General Electric Company, hopes to produce electrical lightning that would need a current of fifty million volts. Will Dr. Steinmetz please do this: Arrange to get lightning out of the air and back into its mother earth without so much noise and fright. All the fuss is made by the electric spark hopping from cloud to earth, as little sparks fly from ends of broken wire. It ought to be possible to bring that lightning down peaceably and store it up for use at the same time.

Frenchmen in Madagascar are weaving silk of spider webs. female spiders — males amount to little among spidersnearly three inches long spin 300 to 400 yards of web every other day and keep it up did. In out, then lay eggs and die. In the silk worm business you kill the young to get the silk. With spiders you could save them all. The spider silk is beautiful and

It interests steel makers, for the thread spun by a spider is stronger, in proportion to size, than the finest steel cable. How does the spider every other day manufacture within herself 300 yards of such material, and how does she make a perfect web, with no mother or other teacher to show her? She has done it for thousands of centuries.

In the billions of years ahead of human beings, they may be born with knowledge, ready made, far in excess of what the wisest possesses now.

The Rev. Dr. MacArthur gave way to Dr. Straton in the pulpit of Calvary Protestant Church in York. They kept Dr. Mac-Arthur's name on the church calendar as pastor emeritus. He orders it taken off, because Dr. Straton is too sensational.

Dr. Straton preached violently againste prize fighting, perhaps bearing in mind the text about turning the other cheek, which prize-fighters never do, if they

can help it. What would Dr. MacArthur say if Dr. Straton took a heavy whip downtown and beat the brokers in the stock exchange, driving them all out? What are the proper limits of sensationalism in a clergyman that calls himself, as Dr. Straton does, "God's prophet?"

The Oklahoma Agricultural College, having borrowed a healthy, young boy baby for experiment, will try by extreme care to make of him a superior type. It's an interesting, useful experiment. Such work applied to fifteen hundred million human beings on earth would raise the average considerably.

But what counts can't be done with that baby now. It was done in the brains of his ancestors centuries ago. Some sickly, neglected child will do with his brain work that the Agricultural College baby probably will never

babyhood, ill all his life; Hope, sewed up in a canvas jacket each morning that he might sit up for his work; Caesar with fits; Napoleon with fits, and the itch: Keats, sickly, consumptive; Poe with nerves that tormented him none would be selected as the Agricultural College baby, but

they did work. Agricultural College can do wonders with pigs and cattle, less with men—the brain is hard to reach and slow to develop. It would take 10,000 years to breed African savages up to halfway accomplishment. Therefore wise nature lets them die off-it's cheaper.

No sign yet of an Irish settle-ment. And it may not come at all. Meanwhile, fighting goes on in the north of Ireland. Two rirls, among others, are shot

dead in the street. Hatred between north Ireland and south Ireland is the real danger. And a similar situation is brewing between north and south Germany: The monotony of in-ternational war may be varied by two civil wars, Irish and Ger-

STILLMAN CASE LIKELY TO REMOVED TO COURTS OF PARIS

Decision for Either Husband or Wife Apparently Impossible. Banker Seeks Peerage.

NEW YORK, Sept. 20.-Final ssues in the internationally famous divorce case of James A. Stillman against Anne Urquhart Potter Stillman, involving the legitimacy of the birth of baby Guy Stillman, charged to be the son of Fred Beauvais, an Indian guide, it is now believed, will be fought out in the Paris courts.

Aspires to Peerage.

James A. Stillman already is in a position to claim legal residence in Paris and may later aspire to an English peerage, as was the case with Viscount Astor, it was predicted by friends of the banker.

The reason the case is expected to find its way into the courts of Paris is because the divorce issue may be deadboth Mr. and Mrs. Stillman are proven to have been inconstant, neither can be awarded a divorce in New York. The only question which will be settled

To anticipate a court's decision is lowed the case believe it possible that such a deadlock in the divorce matter will be reached. In such event either Mr. Stillman or Mrs. Stillman could basis of peace. bring suit in Paris.

Decree Unlikely Here.

In case of a deadlock, Mrs. Stillman will remain the wife of Mr. Stillman, but he, under the New York law, will be under no obligation to give even a penny to her support, because the law is that a husband does not have to grave act as well as disloyalty." support a wife proven guilty of in-fidelity. On this matter Referee Dandel Gleason and Justice Morchauser

The French law, however, compele the husband to support the wife un der such conditions and also calls upon him to support all of the chilwhether legitimate or illegiti-It is pointed out that Mrs. Stillman stands to win more in her contentions under the French law than the New York law. Should a French court grant the divorce, it would be recognized in any country, even in a court which had previously passed adversely on the matter. Mr. Stillman maintains a home in Paris at all'times and has' for many vears. That he will move to Paris

was not denied by those authorized to talk for him today. Leeds Charge Not Denied.

At no time during the progress of he divorce case has Mr. Stillman denied the charges brought by his wife regarding his association with Mrs. Florence Lawlor Leeds, former Century Roof actress. Mrs. Leeds has never wanted for any of life's comforts and her baby boy, Jay Leeds, also has been provided for. The records of the court show that Mr. Stillman has made liberal proivsion for Mrs. Stillman and all he admits living with her as a hus-band. He ceased to live with her as husband about eight years ago, he has told his friends. But at no time did he cease to provide for her or the children, and testimony shows

that he gave her presents even after the birth of baby Guy. **Next Sunday Morning** Mr. Stillman, so far as is known (Continued on Page 3, Column 6.)

striking features in The Washington Times

This will be one of the

ence, Alabaman to Seek Strictures on Conclave.

Opposition to Congress making any approaching conference on the limition of armement and Far Eastern questions was expressed today by Senator Oscar W. Underwood, of Alabama, the Democratic minority leader

White House. As one of the American representatives at the conference, Senator Undrwood said he would be "very glad rsonally, to see the sessions open, but that there were other nations to be considrd in the matter.'

Not Up to President.

Underwood expressed the opinion hat it is not within the province of Congress to pass a resolution or to take any other action to request or suggest to the President that he use his influence to have the sessions

He intimated that he did not conrider the question of whether the set sions are to be open or closed one that s properly the ' 'business of Congress." Underwood's declaration was rerarded as unusually important in view f the fact that Senator Pat Harrison, Democrat, of Mississippi, is planning o again press upon the Senate his res olution for open sessions which failed of adoption before the Congressional ecess.

Opponents Active.

Senators Borah, Republican, Idaho and Johnson, Republican, of California are also preparing to renew their fight for open sessions and 'pitiless publicity.'

In view of Underwood's statement t is believed that Harrison may withhold his resolution, especially as Sen-Senator Kellogg to Run Again, ator Hitchcock of Nebraska, ranking Democratic member of the Senate for eign relations committee, and other Democratic leaders of the Senate have expressed themselves as anxious and willing to co-operate with President Harding in helping to make the con-
